

“WOLF” (Pat.Pend) Broadband NVIS Antenna

The “Wolf” Folded Dipole antenna is designed as a regional coverage antenna intended for near and mid-range HF communications in environmental disasters and military tactical scenarios. This antenna can be configured as a Flat Top NVIS antenna, Inverted “V” for medium to long ranges, or a Sloping directional antenna. Its strong NVIS (Near Vertical Incidence Skywave) capabilities allow for communications over mountainous terrain or in Jungle environments and its full 2-30 Mhz spectrum broadband coverage makes it an excellent antenna for ALE operations without the need for a tuner/ coupler reducing system costs. No radial ground plane or grounding is required making the antenna ideal for rooftop or on the fly installations. The “Wolf” antenna can be purchased in Tactical or Permanent models. **Also available**, is a complete “Wolf KIT” system with the optional roll up mast and is erected in less than 10 minutes. Roll Up fast deploy Mast’s are available to 15ft in the Wolf Kit system with or without embedded VHF, UHF, L-Band and HF capability.

White Wolf Systems “WOLF” BroadBand Folded Dipole Antenna

Antenna	Specifications
Frequency	2-30 Mhz Broadband
Power: Options per model purchased	50w – 500w Data 50w – 500w PEP
Impedance	50 Ohms
Polarization	Horizontal
VSWR	1.5 to 1 Maximum
Pattern	Omni-Directional
Weight	5.5 lbs
